<b>Office Action Summary</b>	<b>Application No.</b> 10/516,391	<b>Applicant(s)</b> REAST, JOHN BOLLAND	
	<b>Examiner</b> Faye M. Fleming	<b>Art Unit</b> 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claims 4, 5, 9, 10, 16, 18 and 19 is withdrawn in view of the reference(s) to Lutman (1,534,533). Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 8, 10, 11, 13-15 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Lutman (1,534,533).

Lutman discloses a sub-assembly for a vehicle suspension system comprising a leaf spring (a, b); a pair of mountings (m) located at respective fore and aft ends of the leaf spring and adapted to be directly attached to respective ones of a pair of fore and aft brackets (e) secured to the frame of an associated vehicle; and complementary means (m) associated with the leaf spring and with at least one of the fore and aft mountings and adapted to permit adjustment of the free assembly length of the spring between its fore and aft mountings during assembly of the sub-assembly. The complementary means (m) for permitting adjustment of the free assembly length of the leaf spring between its fore and aft mountings, comprises an oversize aperture (m1) in the leaf spring, through which aperture spring securing means of the mounting extends. The oversize

Art Unit: 3616

aperture (m1) comprises a slot and the spring securing means comprises a clamping bolt (see figure 1). Regarding claim 8, in addition to the above described structure Lutman discloses another mounting (c) is provided at the center of the leaf spring. The sub-assembly is attached directly to one side of a vehicle frame by means of frame brackets via (f) (see lines 105-108); wherein the brackets are old and well known in the art.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lutman (1,534,533) in view of Reast (5,507,516).

Lutman discloses the claimed invention except for the leaf spring mounted to the vehicle frame via an anti-roll device. Reast discloses a vehicle suspension comprising a leaf spring 11 mounted to a vehicle frame 17 by an anti-roll device 13 extending transversely of the frame. Based on the teachings of Reast, it would have been obvious to one having ordinary skill in the art at time the invention was made to have modified the assembly of Lutman to include an anti-roll device to provide an attachment means for the leaf spring to the vehicle.

***Allowable Subject Matter***

6. Claims 18 and 19 are allowed.

***Response to Arguments***

7. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye M. Fleming whose telephone number is (571) 272-6672. The examiner can normally be reached on M-F (9:00-5:00).
